EWS is the specialist in fungus clean-up

Fungi and wood harming moulds can cause a lot of financial and material damage to wooden floors in homes and buildings. The cause? Badly ventilated crawl spaces and basements that have been moist for a long time. Fungus infestations not only cause a lot of damage, but are also detrimental for your health.

EWS provides you with an excellent custom advice and offers proper solutions. In doing so, we use our broad knowledge, experiences and the newest techniques in this area.

EWS aims for a professional approach of fungus control:

- Inspection;
- Removal of wooden parts damaged by fungi;
- Fungus treatment with a pesticide;
- Removal of fungus contamination;
- Injecting and treating foundations;
- Applying crawl space isolation;
- Renewal of removed wooden parts or;
- Floor renovation.

We can help you with both a preventive and curative treatment fungus infestations. After implementation of the advised activities, we issue an elaborate warranty.

Do you suspect fungus infestation and would you like to apply for a non-binding inspection? Don't hesitate to contact us.
